MANAGEMENT DISCUSSION AND ANALYSIS

The Group has two reportable segments which comprised its major business segments. These business segments are involved in different activities and are managed by segment managers who report directly to the Group's executive directors. The reportable segments are as follows:

- (i) Automated equipment: Designing, development and manufacturing of standard and non-standard standalone automated equipment.
- (ii) Automated manufacturing solution: Designing, development and installation of customised integrated automated manufacturing solutions.

Performance of the respective operating segments in 1Q2018 as compared to 1Q2017 is analysed as follows:–

The Group recorded a higher revenue at MYR98.0 million in 1Q2018 as compared to MYR45.8 million recorded in 1Q2017, representing an increase of 113.9%. The Group's revenue was primarily contributed by both the automated equipment and automated manufacturing solution segments which constituted approximately 92.2% and 7.8% of the Group's total revenue respectively.

Automated equipment segment

This segment recorded an increase in revenue by MYR48.0 million to MYR91.1 million in 1Q2018 as compared to the previous corresponding period. The substantial increase in revenue by approximately 111.5% from this segment was mainly attributable to the stronger demand for our test equipment namely microelectromechanical systems (MEMS) & smart sensor test handler solutions from the telecommunication market, particularly the smart mobile device sector. The rise in such demand was underpinned by the increasing prevalence of smart sensors in mobile devices resulting in the growth in demand for our highly customised testing equipment for these sensors.

Automated manufacturing solution segment

Revenue from the automated manufacturing solution segment in 1Q2018 was MYR12.4 million, which was MYR9.3 million higher than the revenue of MYR3.1 million in the previous corresponding period, representing an increase of 297.3%. The increase in revenue from this segment was mainly due to a higher demand for integrated automated manufacturing solutions from a more diversified customer base in the telecommunication and automotive markets stemming from increasing demand for factory automation.

The following table sets out revenue breakdown by customers' segment for both the automated equipment and automated manufacturing solution segments:

For the three months ended

31 March	2018		2017	
	MYR'000	%	MYR'000	%
Semiconductor	14,992	15.3%	8,337	18.2%
Telecommunication	69,200	70.6%	30,667	66.9%
Automotive	8,729	8.9%	349	0.8%
Consumer electronics	3,252	3.3%	6,476	14.1%
Medical devices	–	0.0%	1	0.0%
Others	1,875	1.9%	13	0.0%
	<u>98,048</u>	<u>100.0</u>	<u>45,843</u>	<u>100.0</u>

Gross margin

The gross profit margin of the Group historically ranged from 28.1% to 31.8% over the last four years. Gross profit margin in the first quarter increased by 1.7% to 30.1% compared to 28.4% for the corresponding period last year. Such increase was primarily attributable to the improvement in gross profit of the automated equipment segment following the better margin secured from projects delivered to customers in the telecommunication sector. The improved gross profit margin in 1Q2018 was further augmented by the economies of scale brought about by the substantial growth in sales in 1Q2018.

Other income

Other income increased from MYR3.8 million in 1Q2017 to MYR5.9 million in 1Q2018. Other income mainly consisted of gain from changes in fair value of foreign currency forward contracts of MYR5.5 million recorded during the first quarter. The gain from these changes in fair value of foreign currency forward contracts recorded in the first quarter was offset by the net loss on foreign exchange of MYR4.8 million recorded under the administrative expenses, resulting in a net gain on foreign exchange of approximately MYR0.7 million during the quarter. The net loss on foreign exchange arose from the depreciation of U.S. dollar against MYR in the same quarter.

Administrative expenses

Administrative expenses increased from MYR6.1 million in 1Q2017 to MYR12.6 million in 1Q2018, mainly attributable to the loss on foreign exchange and non-recurring listing expenses incurred by the Group for the first quarter as well as an increase in staff costs.

The Group's sales and receivables were predominantly denominated in U.S dollar. The loss on foreign exchange was mainly due to the short term appreciation of our functional currency, MYR against the U.S. dollar towards the end of the first quarter in 2018. Such loss was offset by the gain from changes in fair value of foreign currency forward contracts recorded under other income. Our Group generally enters into foreign currency forward contracts as part of our treasury policy to manage our foreign currency exposure.

In addition to the above, the listing expenses of MYR1.6 million also contributed to the higher administrative expenses recorded in the first quarter. Meanwhile, staff costs increased from MYR1.4 million in 1Q2017 to MYR3.8 million in 1Q2018, mainly due to an increase in both staff remuneration and headcount.

Profit for the quarter

From the bottom line perspective, the Group closed its first quarter of 2018 with net profit of MYR21.2 million (1Q2017: MYR9.1 million) after taking into account the listing expenses related to the listing exercise of the Company. Should the effects of such expenses be excluded, the Group would have exhibited a net profit of MYR22.9 million, an increase of 150.6% from MYR9.1 million recorded in the first quarter of 2017. Similarly, the adjusted EBITDA (earnings before interest, tax, depreciation and amortisation) for the first quarter of 2018 stood at MYR25.1 million as compared to MYR10.8 million in the first quarter of 2017.

Prospect

The Group expects 2018 to be another good year with continued strong demand from our customers as evidenced by the size of outstanding secured orders of approximately MYR314.5 million received up to 31 March 2018 (up from MYR249.2 million as of 31 December 2017), with majority of the orders to be delivered in the remaining months of 2018. In view of the smart sensing and electric vehicle trends in 2018, we expect sales growth momentum to be driven by both the telecommunication and automotive sectors. We also expect delivery of projects involving large-scale factory automation lines in the second half of the year following the anticipated completion of our new production plant in June 2018.
